Ian Anderson  
Enviro-Tab Ltd

Dear Ian,

Thank you for introducing me the Enviro-tab Product.

Prior to using this product I had an emissions test completed on a 2003 Commodore Station wagon.

The results came back with a limited pass, but also a warning that it may not pass again.

The Fuels usage was Approx 15-18 litres per 100 Km around town, and 9.9 L per 100 Km on a trip

After 2 tank fills using Enviro-tab, the Fuel consumption had changed to an average of 13 L per 100 Km around town, and 8.9 L per 100 Km on to open road.

The Vehicle was re tested for emissions, and showed improved results across the measured spectrum. It now meets all emission requirements.

I have found it now runs better, has more power, which is delivered much more smoothly.

We also have a ford Econovan with 600,000 km on the clock which has shown similar results.

Regards

Niall McGuire
