

Enviro-Tab

Protecting the air we breathe

The quality of the air we breathe determines the health of our bodies. While New Zealand is a small country at the bottom of the South Pacific and does not move, the air we breathe is shared all over the world.

In New Zealand we are proudly known as "clean and green."

To do our part in preserving this reputation, we at Enviro-Tab (NZ) Ltd have been involved in years of research and development in the automotive industry. The Enviro-Tab fuel pill is the result of all this development.

China's Ministry of Traffic have conducted independent testing, and have reached the same conclusion that we have - that by using this amazing product:

- 1) emissions are reduced
- 2) power is restored
- 3) economy is improved through cleaner and more efficient fuel burning.

Based on their stringent test protocols, the Chinese government have endorsed and approved the Enviro-Tab fuel pill as a strategic way of assisting in the reduction of their combustion engine emissions.

Paul, Ian, and myself have just returned from China, following meetings with various government officials, and the consensus is that China wants our product for the new 'eco-city' they are about to build, as well as for their existing cities.

Exhaust emissions reduction is our *100% guarantee* and the additional flow-on benefits of better fuel economy, power and internal cleaning are inevitable. The exact rate and percentages will vary depending on the driver's individual driving style, and each respective vehicle's condition.

Our invitation to you is to try our product, follow our protocols and share your results with us - you may even finish up on our 'News' page!

The Enviro-Tab website is designed so that you can test and investigate our product for yourself. We have included test protocols that can be printed off. The website will also be updated with news on who has committed to using Enviro-Tab, further test protocol results and any new developments that we have since discovered.

It has been a long road involving a lot of hard work - and fun, too! - getting to this stage. The team at Enviro-Tab are looking forward to assisting Kiwis to reduce their emissions, and seeing them enjoy all the other flow-on benefits of this little pill that can do so much.

We look forward to meeting with you soon, and talking with you about this amazing product.

Peter Rasmussen
Director
Enviro-Tab (NZ) Ltd
